Allowable Subject Matter

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, Ganeshmoorthy et al (US 6,392,599 B1) discloses a planar antenna assembly supported on a substrate, the antenna comprising a monopole element; at least one grounded parasitic element located proximate the monopole element, wherein each grounded parasitic element is grounded to a planar ground plane and incorporates a conductive profile shaped so that the separation between the parasitic element and the monopole element varies along the length of the parasitic element. Ganeshmoorthy, however, fails to specifically teach the configuration wherein the monopole element and the grounded parasitic element are both extending from the substrate.

Claims 2-18 are allowed for depending on claim 1.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 2005/0110692 discloses an antenna assembly comprising a monopole element and at least one grounded parasitic element located proximate the monopole element.

Art Unit: 2821
